

THERE ARE MORE THAN **90,000 DAMS**  
**ACROSS THE U.S.** AND IF YOU LIVE  
NEAR ONE, **YOU COULD BE AT  
RISK FOR FLOODING.**

- Many of them are aging.
- Many weren't built for extreme storms that are growing more common.
- Learn whether your property is below a dam at the [National Inventory of Dams](#).
- Protect the life you've built with flood insurance.
